Objective and Investment Policy

The Sub-Fund is passively managed. The Sub-Fund is a financial product that promotes among other characteristics, ESG characteristics pursuant to Article 8 of the Disclosure Regulation. The objective of the Sub-Fund is to track the performance of the MSCI World Screened Select ex Thermal Coal (the "Index"). The anticipated level of the tracking error, under normal market conditions, is indicated in the prospectus of the Sub-Fund. The Index is an equity index based on the MSCI World Index representative of the large and mid-cap stocks across developed market countries (the "Parent Index"), that excludes companies from the Parent Index based on environmental, social or governance (ESG) criteria (e.g. exclusion based on business activities, including controversial weapons). Then, the Index applies on the remaning investment an interative process aiming to reach a minimum 30% reduction in carbon emission intensity relative to its Parent Index. The remaining securities are then weighted by their free-float adjusted market capitalization. The Index is a net total return index, meaning that dividends net of tax paid by the index constituents are included in the Index return. The Index value is available via Bloomberg (MXWOSCNU). The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents in a proportion extremely close to their proportion in the Index. The Investment Manager will be able to use derivatives in order to deal with inflows and outflows and which relate to the Index or constituents of theIndex for investment and/or efficient portfolio management. In order to generate additional income to offset its costs, the Sub-Fund may also enter intosecurities lending operations.

Under the ESMA rules or the FCA rules, funds distributed in the EU or the UK are not allowed to report performance returns if the fund is less than 12 months old.

Risk Indicator *(Source : Fund Admin)*

⚠ The SRI represents the risk and return profile as presented in the Key Information Document (KID). The lowest category does not imply that there is no risk. The SRI is not guaranteed and may change over time. The risk indicator assumes you keep the product for 5 years.
The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movement in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you. Additional risks: Market liquidity risk could amplify the variation of product performances. This product does not include any protection from future market performance so you could lose some or all of your investment. Beside the risks included in the risk indicator, other risks may affect the Sub-Fund's performance. Please refer to the AMUNDI ETF ICAV prospectus.
