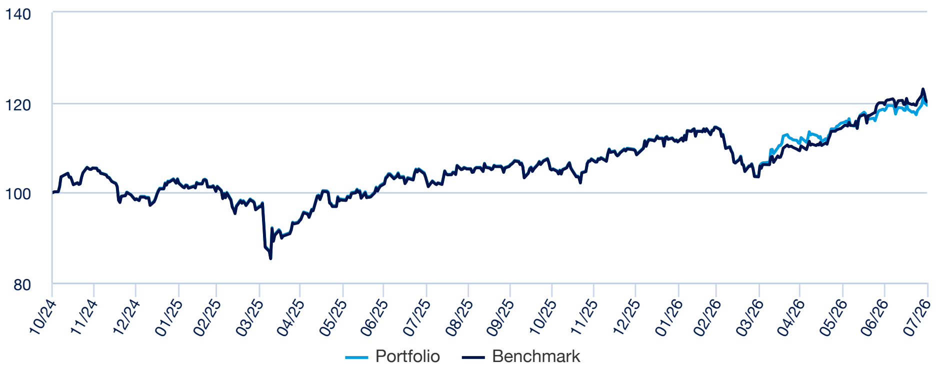
EQUITY

Objective and Investment Policy

The Sub-Fund is passively managed. The objective of the Sub-Fund is to track the performance of the S&P 500 Equal Weight ESG+ Index (the "Index"). The anticipated level of the tracking error, under normal market conditions, is indicated in the prospectus of the Sub-Fund. The Index is an equity broad-based, equal weight index that measures the performance of securities meeting sustainability criteria, while maintaining similar overall industry group weight as the S&P 500 Equal Weight ESG+ Index (the "Parent Index"). The Sub-Fund promotes environmental and/or social characteristics through among others, replicating an Index integrating an environmental, social and governance ("ESG") rating. The Index methodology is constructed using a "Best-in-class approach": best ranked companies are selected to construct the Index. "Best-in-class" is an approach where leading or best-performing investments are selected within a universe, industry sector or class. It excludes companies falling behind on an ESG level, particularly on the basis of ESG ratings. Using such Best-in-class approach, the Index follows an extra-financial approach significantly engaging that permits the reduction by at least 20% of the initial investment universe (expressed in number of issuers). More information on the exclusions applied by the Index pursuant to EU Paris-aligned Benchmark (PAB) is available in the section “Guidelines on funds’ names using ESG or sustainability-related terms” in the Prospectus. The Parent Index is the equal-weight version of the S&P 500 Index representative of the largest companies listed in the USA. The Index is a net total return index, meaning that dividends net of tax paid by the index constituents are included in the Index return. More information about the composition of the Index and its operating rules are available in the prospectus and at www.spdji.com The Index value is available via Bloomberg (SPXEEPUN). The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents in a proportion extremely close to their proportion in the Index. The Investment Manager will be able to use derivatives in order to deal with inflows and outflows and which relate to the Index or constituents of the Index for investment and/or efficient portfolio management. In order to generate additional income to offset its costs, the Sub-Fund may also enter into securities lending operations.

Performances from 31/10/2024 to 31/07/2026 (Source : Fund Admin)



Risk indicators (Source: Fund Admin)

	1 year	3 years	Inception to date *
Portfolio volatility	11.23%	13.81%	13.79%
Benchmark volatility	10.74%	13.69%	13.67%
Sharpe ratio	1.40	0.58	0.65

* Volatility is a statistical indicator that measures an asset’s variations around its average value. For example, market variations of +/- 1.5% per day correspond to a volatility of 25% per year. The higher the volatility, the higher the risk.

Cumulative returns* (Source: Fund Admin)

Spread	0.05%	0.25%	-	-	-

** Source : Amundi. The above cover complete periods of 12 months for each calendar year.* ***Past performance is no predictor of current and future results and does not guarantee future yield*** *. Any losses or gains do not take into consideration any costs, commissions and fees incurred by the investor in the issue and buyout of the shares (e.g. taxes, brokerage fees or other commissions deducted by the financial intermediary). If performance is calculated in a currency other than the euro, any losses or gains generated can thereby be affected by exchange rate fluctuations (both upward and downward). The discrepancy accounts for the performance difference between the portfolio and the index.*

EQUITY

Risk Indicator *(Source : Fund Admin)*

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you. Additional risks: Market liquidity risk could amplify the variation of product performances. This product does not include any protection from future market performance so you could lose some or all of your investment. Beside the risks included in the risk indicator, other risks may affect the Sub-Fund's performance. Please refer to the AMUNDI ETF ICAV prospectus.
