Objective and Investment Policy

The investment objective of the Fund is to track both the upward and the downward evolution of the S&P Eurozone LargeMidCap Net Zero 2050 Paris-Aligned ESG Net Total Return Index (the Benchmark Index") denominated in Euro, while minimizing the volatility of the difference between the return of the Fund and the return of the Benchmark Index (the "Tracking Error"). The anticipated level of Tracking Error in normal market conditions is indicated in the prospectus.

Risk Indicator *(Source : Fund Admin)*

The SRI represents the risk and return profile as presented in the Key Information Document (KID). The lowest category does not imply that there is no risk. The SRI is not guaranteed and may change over time. The risk indicator assumes you keep the product for 5 years.
The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movement in the markets or because we are not able to pay you.

« Technical net asset values may be calculated and published for any calendar day (excluding Saturdays and Sundays) that is neither a business day nor a transaction day. These technical net asset values are merely indicative and will not be the basis for purchasing, switching, redeeming and/or transferring shares."

Any losses or gains do not take into consideration any costs, commissions and fees incurred by the investor in the issue and buyout of the shares (e.g. taxes, brokerage fees or other commissions deducted by the financial intermediary). If performance is calculated in a currency other than the euro, any losses or gains generated can thereby be affected by exchange rate fluctuations (both upward and downward). The discrepancy accounts for the performance difference between the portfolio and the index.*

Index Data (Source : Amundi)

Description of the Index

The Benchmark Index is representative of the performance of eligible equity securities from the S&P Eurozone LargeMidCap Index (the "Parent Index") selected and weighted to be collectively compatible with a 1.5°C global warming scenario. The weighting strategy aims to minimize through optimization the difference in constituent weights to the Parent Index while simultaneously delivering a broad range of climate objectives covering transition risk (for instance a minimum self decarbonization rate of greenhouse gas emissions intensity equating to at least 7% on average per annum), climate change opportunities (through substantially higher green-to-brown revenue share) and physical risk (through a reduced exposure to physical risks from climate change using Trucost's Physical Risk dataset as defined in the methodology of the Benchmark Index). The Benchmark Index aims to meet and maintain the criteria set out by the European Union's Technical Expert Group on Climate Benchmark's ESG Disclosures, to qualify as an EU Paris-Aligned Benchmark ("EU PAB").

Socially Responsible Investment (SRI)

The SRI expresses sustainable development objectives in investment decisions by adding Environmental, Social and Governance (ESG) criteria in addition to the traditional financial criteria.

SRI thus aims to balance economic performance and social and environmental impact by financing companies and public entities which contribute to sustainable development whatever their business sector. By influencing the governance and behaviour of stakeholders, SRI promotes a responsible economy.

Evaluation by ESG criteria (Source: Amundi)

	Benchmark	Parent index
Overall Rating	8.34	7.99
Environment	7.07	6.66
Social	5.34	5.66
Governance	6.89	6.60

ESG criteria

The criteria are extra-financial criteria used to assess the Environmental, Social and Governance practices of companies.

Environmental, Social, and Governance risks and opportunities are posed by large scale trends (e.g. climate change, resource scarcity, demographic shifts) as well as by the nature of the company's operations.

Scores are on a 0-10 scale, with 10 being the best.

"E" for Environment (Climate Change, Natural Resources, Pollution & Waste and Environmental Opportunities)

"S" for Social (Human Capital, Product Liability, Stakeholder Opposition and Social Opportunities)

"G" for Governance (Corporate Governance and Corporate Behavior)

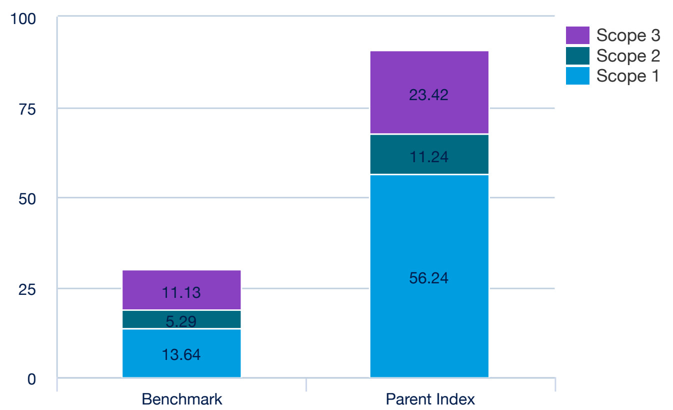
Carbon footprint

Carbon footprint: carbon emissions per euro million invested

	Benchmark	Parent Index
Total carbon portfolio footprint (Index/Parent index) :	30.06	90.90



Carbon footprint

This indicator measures the portfolio's carbon emissions in metric tonnes of carbon equivalent (tCO2e) per euro million invested.
This is an indicator of the emissions generated by investment in this portfolio.

Definition of scopes :

- Scope 1 : all emissions that arise directly from sources that are owned or controlled by the company.

- Scope 2 : all indirect emissions generated by the purchase or production of electricity, steam or heat.

- Scope 3 : All other indirect emissions, upstream and downstream of the value chain. For reasons of data robustness, Amundi has chosen to use emissions from activities upstream of Scope 3 - Source: Trucost EEI-O model (input/output model extended to the Trucost environment).

Source : The carbon emissions data is supplied by Trucost. It corresponds to companies' annual emissions expressed in tCO2e, which covers the six greenhouse gases defined in the Kyoto protocol whose emissions are converted into global warming potential (GWP) in CO2 equivalent.
