Objective and Investment Policy

The Fund is a passively managed index-based UCITS. The Fund's objective is to replicate, both upwards and downwards, the performance of the IBEX 35 Net Return Index (net dividends reinvested) (the "Benchmark"), denominated in euro (EUR), the main Spanish stock exchange index, while minimising the tracking error between the Fund's performance and that of the Benchmark. The expected level of the Tracking Error under normal market conditions is indicated in the Fund prospectus. The Bolsa Madrid website (http://www.bolsamadrid.es/ing/aspx/Indices/Resumen.aspx) provides more detailed information about the Bolsa Madrid indices. The Fund aims to achieve its objective through direct replication, namely by investing primarily in the components of the Benchmark. In order to optimise Benchmark replication, the Fund may use a sampling technique, as well as guaranteed temporary sales of securities. Any use of these techniques is indicated on the website amundietf.com. The updated composition of the portfolio of securities held by the Fund is mentioned on the website amundietf.com. In addition, the indicative net asset value appears on the Fund's Reuters and Bloomberg pages and may also be mentioned on the Fund's stock exchange websites. The Fund is eligible for the French Plan d'Epargne en Actions (PEA) and, consequently, invests a minimum of 75% of its assets in the shares of European Union countries.

MONTHLY COMMENTARY (Source: Amundi)

Management commentary

The eurozone delivered a positive surprise in July, with a preliminary estimate of Q2 growth significantly exceeding expectations. The Q2 flash GDP came in at +0.4% quarter-on-quarter (compared to 0.1% in Q1), bringing annual growth to +1.0% (versus +0.5% in Q1). This rebound follows several quarters of stagnation amid an energy shock linked to the conflict in the Persian Gulf.

The resumption of hostilities in the Persian Gulf weighed on investor sentiment in July. The dominant theme of the month was the sharp correction in semiconductor and memory stocks, which had driven markets higher in the first half of the year. Investors became increasingly skeptical about the future profitability of capex by tech giants in artificial intelligence infrastructure.

The decline in US and Asian markets was partially offset by the outperformance of European and Chinese stock exchanges, which recorded gains of +0.5% for the Eurostoxx 50 and +13.9% for the HSCEI. In Europe, several large companies reported strong Q2 results as investors sought new themes. For example, Airbus saw a strong increase in its profits, as did Deutsche Bank and BNP Paribas, which confirmed a significant rise in their earnings.

MONTHLY COMMENTARY (Source: Amundi)

Management commentary

Oil prices were extremely volatile in July, driven by the ups and downs of the Iran-US conflict. Brent crude reached a peak of $102 before returning to around $90 depending on periods of tension and calm. In the currency market, the dollar depreciated slightly. The euro-dollar moved back above 1.15 at the end of the month. The Fed’s decision to keep its key rates unchanged supported emerging market currencies. The yen, meanwhile, appreciated by 3.2% following interventions in the currency market. Gold rose by 1.0% to $4046/ounce but remains under pressure.
