Objective and Investment Policy

The Fund is an index-tracking UCITS passively managed. The investment objective of the Fund is to track both the upward and the downward evolution of the SGI Pan Africa Net Total Return index (Benchmark Index") denominated in EUR, representative of the performance of the companies listed on eligible African equities market and companies whose main activity is on the African continent while minimising the volatility of the difference between the return of the Fund and the return of the Index (the "Tracking Error"). The anticipated level of Tracking Error in normal market conditions is indicated in the prospectus. Additional information about the Benchmark Index can be found at www.sgindex.fr. The Benchmark Index is a net total return index. A net total return index calculates the performance of the index constituents on the basis that any dividends or distributions are included in the index returns after withholding tax retention. The Fund seeks to achieve its objective via indirect replication by entering into an over-the-counter swap contract (financial derivative instrument, the "FDI"). The Fund may also invest in a diversified portfolio of international equities, whose performance will be exchanged against the performance of the benchmark Index via the FDI. Updated composition of the Fund holdings is available on www.amundietf.com. In addition, the indicative net asset value is published on the Reuters and Bloomberg pages of the Fund, and might also be mentioned on the websites of the stock exchanges where the Fund is listed.
